

Short Perspective

The History of Perspective Drawing

Italian Renaissance Introduces Perspective

- 1300 - 1500
- Out of advancements in science, math and art came perspective drawing.
- Realistic way of drawing depth.
- Provided an easier way to draw an environment.
- Simplifies drawing shapes to one rule: all things going away from us connect to a vanishing point.
- Perspective first used by Filippo Brunelleschi (end of 14th century), but perfected by Masaccio (beginning of 15th c.).

- Adoration of the Magi (preparatory sketch)
- Leonardo da Vinci
- 1481

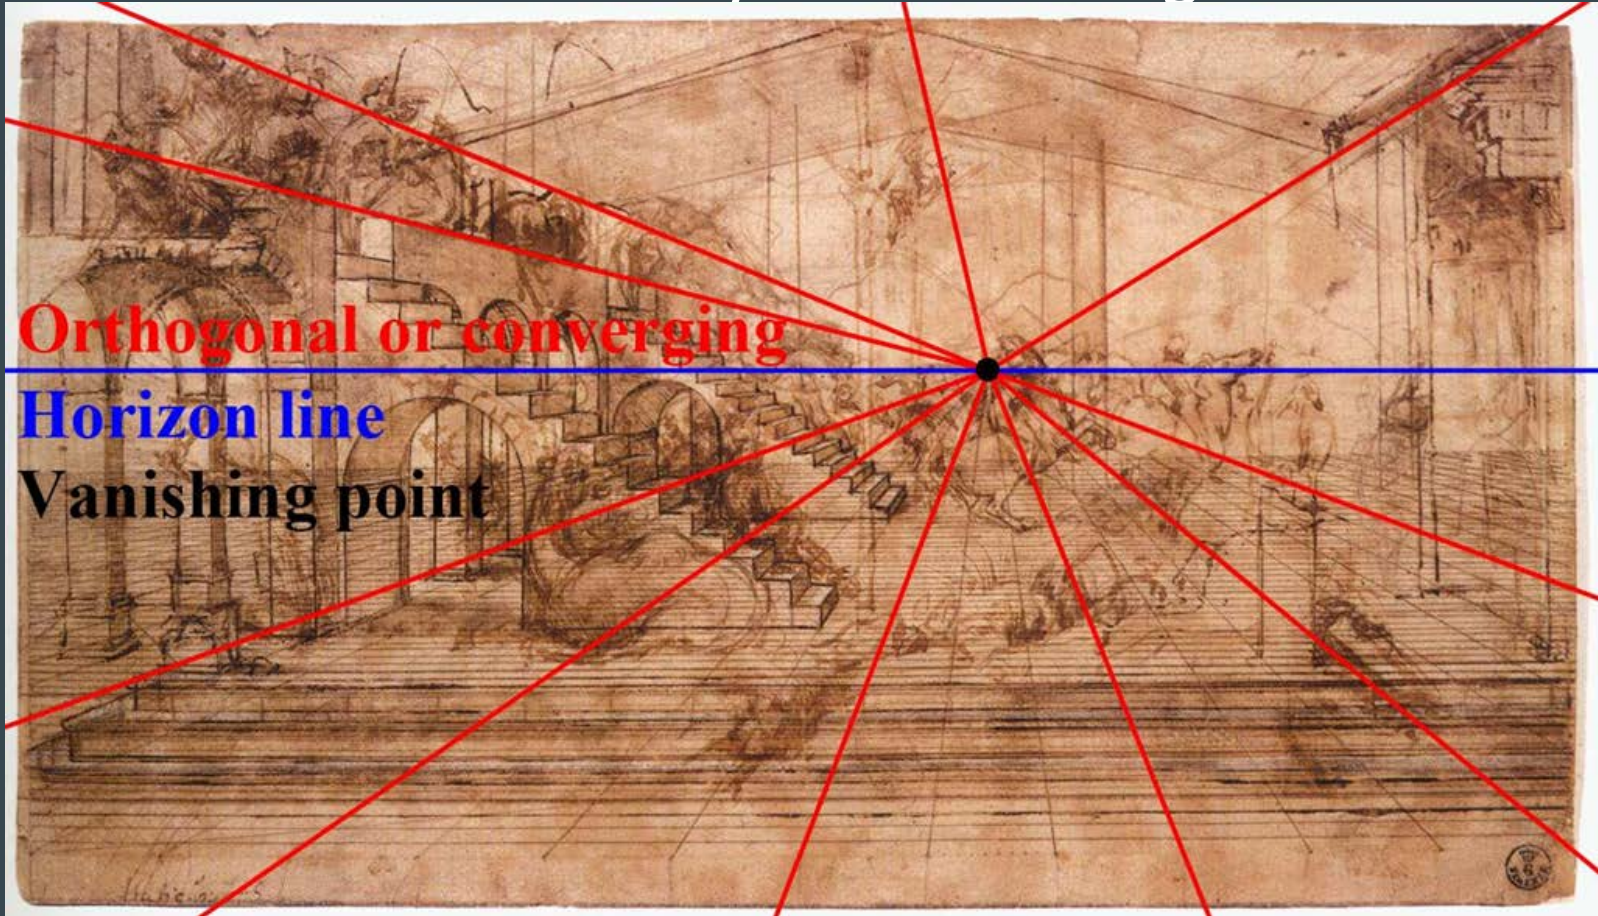

- School of Athens
- Raphael
- Fresco
- Vatican City
- 16' x 25'
- 1511

- World of Edo
- Okumura Masanobu
- Woodblock print
- Japan
- 17" x 24"
- 1745

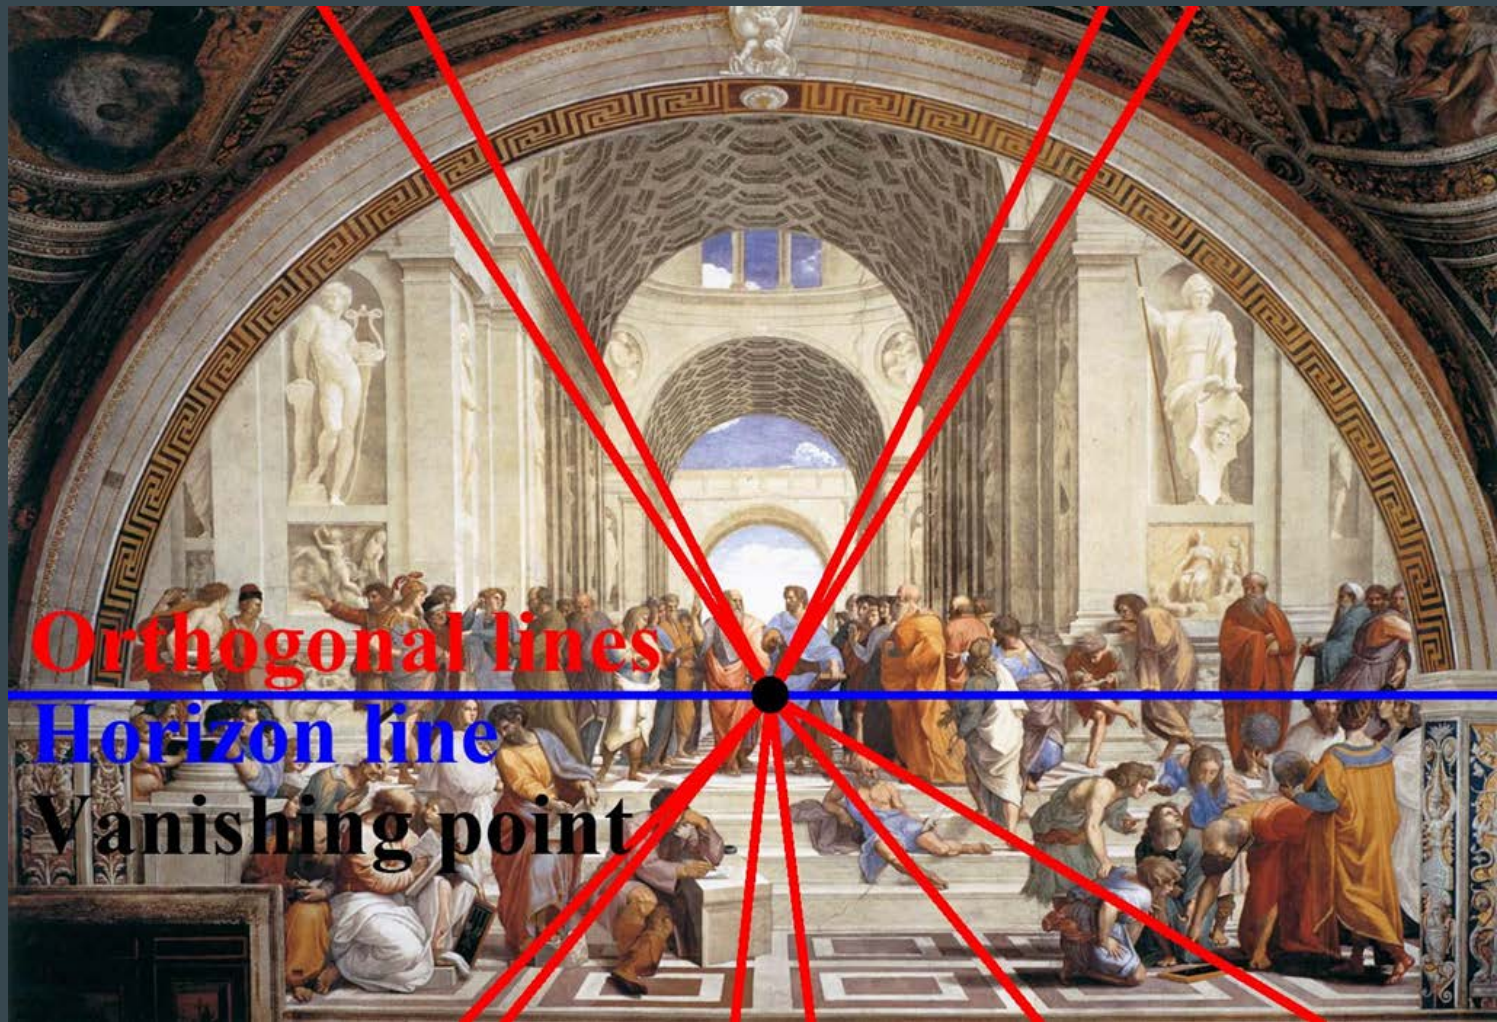

What is *Perspective Drawing*?

Orthogonal or converging

Expectations For Using 1 Point Perspective:

Draw 3 cubes in one point perspective.

Raise your hand and show 3 cube drawing to teacher.

Draw your name in 3-D block letters.

Start with your vanishing point in the middle of the paper.

Use rulers to make all lines straight.

Remember to draw orthogonal lines lightly, so you can erase them later.

My website, under the Perspective tab has the worksheets and 2 videos that can help with your assignment: louanddraw.weebly.com

Reflection

What did you like and/or dislike about this assignment and why?

Did you experience any challenges? What were they?

Pick another student whose artwork you like.
